

Professional Development Taskforce

Workforce Innovation and Opportunities Act (WIOA)

Summary and overview

The Professional Development (PD) Taskforce was chartered by the WIOA Steering Committee to make recommendations on Professional Development for frontline staff at the One Stop Centers, administrative staff and partnerships with the various core programs as Washington State implements the WIOA regulations.

The goal of the Taskforce is to make recommendations regarding professional development to the WIOA Steering Committee where they will review and accept, modify or edit the recommendations to forward to the Workforce Board. The Board will review these recommendations as part of their proposed WIOA development and implementation plan to be sent to the Governor for his input, approval and implementation.

The recommendations should focus on developing an on-going accessible professional development system for:

- Frontline staff within all core programs and One Stops
- Leadership/management staff within all core programs
- Stainability throughout the state
- Accessibility and flexibility to all staff
