Washington State Employers' Workforce Training Needs and Practices

2002

Washington State Workforce Training and Education Coordinating Board

WORKFORCE TRAINING AND EDUCATION COORDINATING BOARD

The Vision

The Workforce Training and Education Coordinating Board is Washington State's valued and trusted source of leadership for the workforce development system.

Mission Statement

The Workforce Training and Education Coordinating Board's mission is to bring business, labor, and the public sector together to shape strategies to best meet the state and local workforce and employer needs of Washington in order to create and sustain a high skill, high wage economy.

To fulfill this Mission, Board members, with the support of staff, work together to:

- Advise the Governor and Legislature on workforce development policy.
- Promote a system of workforce development that responds to the lifelong learning needs of the current and future workforce.
- Advocate for the non-baccalaureate training and education needs of workers and employers.
- Facilitate innovations in workforce development policy and practices.

Workforce Needs and Practices Customer Satisfaction Survey

The Workforce Training and Education Coordinating Board is committed to high quality customer satisfaction and continuous improvement. You can help us meet our commitment by completing this form, detaching it, and mailing it in. Please circle the words that best answer the following questions. In the spaces provided, please elaborate on your response.

1.	How useful is this report?	not useful	somewhat useful	very useful
2.	How clear is this report?	not clear	somewhat clear	very clear
3.	How complete is the information?	not complete	somewhat complete	very complete
4.	How is the information presented?	not enough detail	right amount detail	too much detail
5.	How is the length of the document? too short		about right	too long
6.	Do you want additional copies of this report?		Yes Quantity	No

7. How did you expect to use this report? How have you used this report?

8. How can this report be made more useful in future editions? What additional information would you like to see in subsequent reports?

STATE OF WASHINGTON Workforce Training and Education Coordinating Board 128 - 10th Avenue, S.W. • P.O. Box 43105 • Olympia, WA 98504-3105 Phone: (360) 753-5662 • Fax: (360) 586-5862 • Web: www.wtb.wa.gov • Email: wtecb@wtb.wa.gov

August 2002

Dear Governor Locke, Members of the Legislature, and Partners in the Workforce Development System:

I'm pleased to forward *Washington State Employers' Workforce Training Needs and Practices* to you for your consideration.

This report, based on 2,405 survey responses from Washington employers, presents the best available information on the workforce training needs and practices of employers in our state.

The survey results show that even during a recession there are skill shortages. Too many job applicants do not possess the type and level of education and skills that employers need. Employers most frequently report difficulty finding workers with specific occupational skills such as those taught through community and technical colleges, private career schools, and apprenticeship programs. According to employers, shortages of skilled workers have a substantial negative effect on the performance of their business.

I hope you find this report useful. Soon we will also publish *High Skills, High Wages 2002: Washington's Strategic Plan for Workforce Development*. The Plan will include strategies to address these skill shortages.

I would like to draw your attention to the customer satisfaction survey included in the report. Please let us know your views so that we can improve our service to you.

Sincerely,

mangeles

Ellen O'Brien Saunders Executive Director

NTRODUCTION

Background

Every two years, the Workforce Training and Education Coordinating Board surveys Washington State employers. The Workforce Board uses the survey responses to identify employers' workforce training needs and practices and their satisfaction with workforce training programs. The Board shares the information with policymakers and program administrators in order to improve the workforce development system's responsiveness to employer needs. This report summarizes the survey results on training needs and practices. The survey information on employer satisfaction is published as part of a separate evaluation of the state's workforce training programs, Workforce Training Results.

The Workforce Board conducted the employer survey from September 2001 through February

INDUSTRY	NUMBER OF RESPONSES
Agriculture & Food Processing	171
Services	871
Manufacturing	186
Trade	551
Construction	186
High-Tech ¹	114
Other ²	326
Total	2,405

2002. (A copy of the survey instrument is in Appendix A.) The Board mailed the survey to 12,000 employers, and 2,405 responses were received for a response rate of 20 percent. The survey was sent to a sample of private firms, government agencies, and nonprofit organizations in Washington that had at least one employee. The sample was stratified by firm size, region of the state, and industry. Sample weights were used to make the statistics reported here representative of the 232,000 employers with one or more employee. The results shown, therefore, represent the likely results had all employers with one or more employee responded to the survey.

Figure 1 shows the number of responses received from each industry sector, and Figure 2 (on following page) shows the distribution of responses by firm size.

¹ High-tech includes biotechnology, computers and computer equipment, computer programming, software and maintenance, electronics, precision equipment and instruments, telephone communications, research, and testing.

² Other includes transportation and public utilities, communication, gas, electric and sanitary services, finance, insurance, real estate, and public administration.

Survey results: highlights

Even in a recession, employers were hiring and there were shortages of skilled job applicants.

- Sixty-five percent of Washington employers hired new employees in 2001.
- Among employers hiring, or attempting to hire new employees in 2001, 59 percent reported difficulty finding qualified job applicants.

Why was there a skill shortage during a recession? Employers were looking for skills that many of the unemployed workers and new labor market entrants did not have. Employers reported the greatest difficulty finding job applicants with postsecondary training.

 Among employers attempting to hire workers with postsecondary vocational training (such as training offered in a community or technical college or private career school),
 83 percent reported difficulty finding qualified applicants. In contrast, among employers attempting to hire workers with only a high school diploma,
 37 percent reported difficulty.

Employers most frequently reported difficulty finding job applicants with specific occupational skills.

Figure 2: Distribution of survey responses by employer size

FIRM SIZE	NUMBER OF RESPONSES
1-4 employees	1001
5-19 employees	876
20-99 employees	339
100 or more employees	161
NA	28

- Among employers reporting difficulty finding qualified job applicants, 91 percent had difficulty finding applicants with occupation-specific skills (e.g., they wanted to hire a web designer but had trouble finding one).
- About 85 percent had difficulty finding applicants with problem solving skills, communication skills, or positive work habits and attitudes.
- Employers less frequently had difficulty finding applicants with basic math (66 percent), writing (64 percent), or reading skills (39 percent).

Employers reported that the shortage of skilled workers negatively affected their businesses.

 Among firms reporting difficulty finding qualified job applicants, 63 percent indicated that the difficulty lowered output or sales, and 56 percent said it reduced quality.

SURVEY RESPONSES

The following are the responses to the survey. In some cases, the responses are compared with the responses to the last survey, two years earlier. Additional breakdowns of the survey responses by industry sector are presented in Appendix B.

Number of employers who hired new employees

Question: Has your firm/ organization hired any new employees in the last 12 months?

• Sixty-four percent of employers hired new employees in 2001, compared with seventy-eight percent in 1999. The decline reflects business conditions in the recession. $\label{eq:Figure 3: Percentage of firms reporting difficulty finding qualified job applicants by industry sector$

INDUSTRY	FIRMS ATTEMPTING TO HIRE ³	ALL FIRMS
Agriculture & food processing	66%	49%
Services	63%	44%
Manufacturing	60%	37%
Trade	58%	41%
Construction	48%	31%
High-tech	47%	30%
Other	61%	38%
Total	60%	41%

³ Attempting to hire refers to firms that hired new employees during the last 12 months or that did not hire because of difficulty in finding qualified applicants.

Scarcity of skilled job applicants

Question: In the last 12 months, did your firm/organization have any difficulty finding qualified applicants for any of the jobs you were trying to fill?

- Sixty percent of firms attempting to hire workers during the last twelve months had difficulty finding qualified job applicants. This represents an estimated 89,300 or 41 percent of employers in the state. In 1999, 64 percent of firms attempting to hire had difficulty.
- Compared to 1999, difficulty in finding workers declined most in the construction and hightech industries and among larger firms. Difficulty increased in the agriculture and food processing industries.⁴
- Difficulty in finding qualified workers was not isolated to particular sectors, and both small and large firms faced this problem.

FIRMS ATTEMPTING			
INDUSTRY	TO HIRE	ALL FIRMS	
1-4 employees	57%	30%	
5-19 employees	61%	51%	
20-99 employees	63%	59%	
100 or more employees	69%	69%	

Figure 4: Percentage of firms reporting difficulty finding qualified job applicants by size of firm

WORKFORCE DEVELOPMENT AREA	FIRMS REPORTING DIFFICULTY AMONG FIRMS ATTEMPTING TO HIRE
King County	71%
Pacific Mountain	69%
Benton Franklin	61%
Olympic	61%
Snohomish County	61%
Eastern Washington	54%
Pierce County	54%
Tri-County	51%
Spokane	47%
Southwest Washington	45%
Northwest Washington	43%
North Central WA	42%
Total	60%

⁴ Appendix B contains additional tables by industry sectors.

⁵ Washington is divided into 12 workforce development areas. See Appendix C for a map showing the location of each area.

Washington State Employers' Workforce Training Needs and Practices

 Employers in all areas of Washington State reported difficulty, but the most severe scarcity was reported by those in King County and the Pacific Mountain area (Grays Harbor, Mason, Lewis, Thurston, and Pacific Counties).

Economic costs of skill shortages

Question: How did your firm/ organization respond to the difficulty finding qualified applicants?

• Faced with a shortage of qualified applicants, firms increased recruiting efforts, hired less qualified workers, and left openings unfilled.

Question: Which of the following has resulted from your firm's difficulty in finding qualified applicants?

• Employers believed skill shortages were hurting their businesses by lowering productivity, limiting output or sales, and reducing product quality. Impacts on productivity, output, and service quality were more common in 1999 when skill shortages were more common.

Figure 7: I	Economic	impacts	of skill	shortages

ІМРАСТ	AMONG FIRMS THAT HAD DIFFICULTY	ALL FIRMS
Lowered overall productivity	63%	25%
Reduced production output or sales	63%	24%
Reduced product or service quality	56%	22%
Prevented firm from expanding its facilities	36%	14%
Prevented firm from developing new products/services	33%	13%
Caused firm to move some operations out of Washington	3%	1%

RESPONSE	HAD DIFFICULTY	FIRMS
Increased recruiting efforts	72%	24%
Hired a less qualified applicant	67%	24%

Figure 6: Employer responses to the shortage of qualified applicants

Difficulty finding applicants by level of education

Question: In general, how much difficulty has your firm/organization experienced in the last 12 months finding qualified applicants with the different education levels listed below?

- The problem is the scarcity of workers with postsecondary training, as opposed to a general shortage. Difficulty in finding workers with only a high school diploma, a GED, or without these credentials has declined since 1999.
- Given hiring patterns across firms and levels of reported difficulty, the scarcity of workers with postsecondary *vocational* training affected more firms than were affected by shortages of other workers. An estimated 33,693 firms (18 percent of all firms) had difficulty in finding applicants with vocational certificates or vocational associate degrees.

EDUCATIONAL LEVEL	FIRMS ATTEMPTING TO HIRE AT THAT LEVEL	ALL FIRMS	ESTIMATED NUMBER OF FIRMS
Neither a high school diploma or GED	29%	6%	9,700
High school diploma or GED	37%	11%	21,000
Some college course work	67%	16%	29,500
Vocational certificate	83%	18%	31,700
Vocational associate degree	83%	13%	22,300
Academic associate degree	79%	12%	19,100
Baccalaureate degree	81%	13%	22,100
Master's, doctoral or professional degree	91%	9%	13,800

Figure 8: Employer Difficulty Finding Applicants by Educational Level

- An estimated 26,078 firms (15 percent of all firms) had difficulty in finding applicants with baccalaureate, master's, doctoral, or professional degrees.
- Compared with 1999 responses, difficulty increased most at the master's, doctoral or professional degree level; the vocational associate degree level; and the academic associate degree level.

Difficulty finding workers who have certain abilities and skills

Question: How much difficulty has your firm/organization had finding employees with the following skills?

- Firms found it most difficult to find applicants with the necessary occupation-specific skills.
- Firms also found it difficult to find applicants with problem solving or critical thinking skills, communication skills, and positive work habits.
- Compared with 1999 responses, fewer firms had difficulty finding teamwork and computer skills. More firms had difficulty finding workers with writing skills.

Figure 9: Firms reporting difficulty finding qualified applicants with specific skills and abilities

TYPE OF SKILL OR ABILITY	AMONG FIRMS THAT HAD DIFFICULTY	ALL FIRMS
Occupation-specific skills	91%	33%
Problem solving or critical thinking skills	88%	31%
Communication skills	84%	30%
Positive work habits and attitudes	84%	31%
Ability to adapt to changes in duties and responsibilities	82%	29%
Teamwork skills	76%	28%
Ability to accept supervision	72%	26%
Computer skills	68%	18%
Math skills	66%	22%
Writing skills	64%	22%
Reading skills	39%	13%

Employer-provided classroom training

Question: Did your firm/organization provide or pay for any classroom training, workshops, or seminars (lasting at least four hours) for any employees in the last 12 months?

- Almost one-half (48 percent) of firms provided or paid for some classroom training.
- There are three broad categories of classroom training—training in work place practices, basic skills training (reading, writing, math, and English language skills), and training in jobspecific skills. Among the firms that provided classroom training, 84 percent provided such training in job-specific skills, 73 percent provided it for work place practices, and 17 percent provided it for basic skills.
- Forty-one percent of firms reported that the percentage of their workers who received classroom training increased during the past three years. Firms increased classroom training for a number of reasons—the need to improve quality, changes in technology, and a desire to promote the career development of employees were most often cited.

- Forty percent of firms had tuition reimbursement programs for their employees.
- The incidence of classroom training varied by occupation. It was especially high among managers and professional staff.

Employer-provided on-the-job training

Question: Did your firm/organization provide at least 4 hours of on-thejob training that was described in a written plan or agreement for any employee during the past 12 months?

- Thirty-five percent of firms provided at least four hours of on-the-job training (OJT) described in a written plan or agreement.
- This question was revised for 2001. In 1999, 83 percent of employers reported that they provided on-the-job training when it was defined as "learning from someone else the duties that the job requires while performing work."
- The incidence of on-the-job training also varied by occupation. Employers offered OJT more frequently than classroom training to their clerical and

administrative support staff, and to workers in service, production, construction, operation, and maintenance occupations.

Future needs increasing skill requirements

- Forty-six percent of firms reported that the skills required to adequately perform production or support jobs increased in the last three years. This is consistent with results from the last survey.
- One reason that skill requirements increased is that computer usage has become common. Forty-nine percent of non-supervisory employees used computers in their jobs.
- Another factor that increases skill requirements is the adoption of high-performance work organization practices— 89 percent of firms cross-trained employees to do a number of jobs, 69 percent organized regular meetings with workers to discuss ways to improve practices, 65 percent linked pay to performance, and 46 percent compared performance with that of other firms (benchmarking).

Question: How will your firm's need for employees with each of the types of education listed below change in the next five years?

- Skill requirements will continue to increase. As a result, many firms reported their need for workers with postsecondary training would increase during the next five years.
- Employer projections of skill requirements are similar to those made in 1999. The biggest changes are an increased expected need for vocational associate degrees and for master's, doctoral, or professional degrees.

EDUCATIONAL LEVEL	INCREASE	STAY ABOUT THE SAME	DECREASE
Neither a high school diploma or GED	10%	75%	15%
High school diploma or GED	19%	75%	6%
Some college course work	31%	68%	2%
Vocational certificate	38%	59%	3%
Vocational associate degree	32%	65%	3%
Academic associate degree	25%	73%	2%
Baccalaureate degree	30%	68%	2%
Master's, doctoral or professional degree	27%	70%	3%

SECTION A: RECENT HIRING AND DIFFICULTIES IN FINDING QUALIFIED APPLICANTS

These first questions are about whether you have hired new employees in the last 12 months and about any difficulties you may have experienced in finding qualified applicants.

- 1. Has your firm/organization hired any new employees in the last 12 months?
 - _O Yes

O No

2. Please give your best estimate of the number of job openings you tried to fill in the last 12 months.

1	1	ı	

USE THREE-DIGIT FORMAT. FOR EXAMPLE, 5 WOULD BE ENTERED 005, AND 50 WOULD BE ENTERED 050.

3. In the last 12 months, did your firm/organization have any difficulty finding qualified applicants for any of the jobs you were trying to fill?

_O Yes

○ No -- SKIP TO PAGE 3, SECTION B

4. How did your firm/organization respond to the difficulty finding qualified applicants? MORE THAN ONE RESPONSE IS POSSIBLE. PLEASE INDICATE YES OR NO FOR EACH STATEMENT.

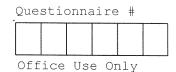

a.	Did not fill the job opening	⊖ Yes	⊖ No
b.	Hired a less qualified applicant	⊖ Yes	⊖ No
c.	Outsourced work or purchased services from another firm	⊖ Yes	⊖ No
d.	Increased overtime hours of current workers	⊖ Yes	O No
e.	Increased recruiting efforts (e.g., advertised more widely)	⊖ Yes	⊖ No
f.	Increased wages to attract more applicants	⊖ Yes	⊖ No
g.	Other, specify:		
		Office U	Jse Only

5. Please indicate the occupation for which your firm/organization had the most difficulty finding qualified applicants in the last 12 months.

Workforce Training: Needs & Practices of Washington State Employers

6. Sometimes firms/organizations may experience difficulty in finding qualified applicants with the formal education required to perform certain jobs. In general, how much difficulty has your firm/organization experienced in the last 12 months finding qualified applications with the different education levels listed below? PLEASE FILL IN ONLY ONE CIRCLE IN EACH ROW. IF YOU DID NOT NEED EMPLOYEES WITH THAT LEVEL OF EDUCATION, FILL IN THE CIRCLE FOR "NOT APPLICABLE" IN THAT ROW.

		Much Difficulty	Some Difficulty	No Difficulty	Not Applicable
a.	Neither a high school diploma nor a GED	1	2	3	6
b.	A high school diploma or GED	1	2	3	6
c.	Some college course work beyond high school	1	2	3	6
d.	A vocational diploma or certificate	1	2	3	6
e.	A vocational associate degree	1	2	3	6
f.	An academic associate (A.A. or A.S.) degree	1	2	3	6
g.	A baccalaureate (B.A. or B.S.) degree	0	2	3	6
h.	A master's (M.A. or M.S.), doctoral (Ph.D) or professional				
	degree from a college or university	()	2	3	6

7. Firms/organizations may also experience difficulty finding qualified applicants with certain kinds of abilities and job skills. How much difficulty has your firm/organization had finding employees with the following skills?

		Much	Some	No	Not
		Difficulty	Difficulty	Difficulty	Applicable
a.	Reading skills	1	2	3	6
b.	Writing skills	1	(2)	3	6
c.	Math skills	1	2	3	6
d.	Occupation-specific skills	1	2	3	6
e.	Computer skills	1	(2)	3	6
f.	Team work skills	1	2	3	6
g.	Problem solving or critical thinking skills	1	2	3	6
h.	Communication skills	1	2	3	6
i.	Positive work habits and attitudes	1	2	3	6
j.	Ability to accept supervision	1	3	3	6
k.	Ability to adapt to changes in duties and responsibilities	1	3	3	6

Workforce Training: Needs & Practices of Washington State Employers

8. Which of the following has resulted from your firm's difficulty finding qualified applicants? PLEASE INDICATE YES OR NO FOR EACH STATEMENT.

a.	Lowered overall productivity	⊖ Yes	O No
b.	Reduced product or service quality	⊖ Yes	O No
c.	Reduced production output or sales	_O Yes	O No
d.	Prevented your firm/organization from expanding its facilities	⊖ Yes	O No
e.	Prevented your firm/organization from developing new products/services	_O Yes	O No
f.	Caused your firm/organization to move some operations out of Washington State	⊖ Yes	O No

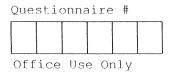

SECTION B: FUTURE NEEDS FOR SKILLED EMPLOYEES

9. Now we would like you to think about future needs of your firm/organization. How will your firm's/organization's need for employees with each of the types of education listed below change in the next five years?

	Employees with	Increase	Stay About the Same	Decrease	Not Needed
a.	Neither a high school diploma nor a GED	1	3	3	6
b.	A high school diploma or GED	1	2	3	6
c.	Some college course work beyond high school	1	2	3	(3)
d.	A vocational diploma or certificate	1	2	3	6
e.	A vocational associate degree	0	$\overline{\mathbf{O}}$	3	6
f.	An academic associate (A.A. or A.S.) degree		2	3	6
g.	A baccalaureate (B.A. or B.S.) degree	1	2	3	6
h.	A master's (M.A. or M.S.), doctoral (Ph.D) or professional degree from a college or university	1	2	3	6

Workforce Training: Needs & Practices of Washington State Employers

SECTION C: EMPLOYEE TRAINING YOU PROVIDE

10. In the last three years, have the skills required to adequately perform production or support jobs (primary or front-line services or support jobs) increased, decreased or remained the same?

○ Increased

○ Remained the Same

○ Decreased

CLASSROOM TRAINING THAT YOU PROVIDE

These next questions are about classroom training, workshops, or seminars your firm/organization uses to train its employees. Please count only types of training that last four hours or longer (a half day). This training may be offered at the worksite or at another location and may occur during the working hours or at other times. These may be conducted either by personnel from your firm/organization or by sources outside your firm/organization. Examples include seminars, lectures, workshops, or audio-visual presentations. If you provide no classroom training, please answer the next question and skip to question 13, which asks about on-the-job training.

11. Did your firm/organization provide or pay for any classroom training, workshops, or seminars (lasting at least four hours) for any employees in the last 12 months?

○ Yes ○ No -- SKIP TO QUESTION 13

12. Did your firm/organization have a tuition reimbursement program for any employee during the past 12 months?

_O Yes

 $_{
m O}$ No

ON-THE-JOB TRAINING THAT YOU PROVIDE

This next question refers to on-the-job training. During on-the-job training, the worker is learning from someone else the duties that the job requires while performing work. We are specifically interested in the extent to which firms provide on-the-job training that includes a formal plan or agreement. In answering this question, please include all employees: full-time, part-time, temporary, seasonal, salaried, and hourly.

13. Did your firm/organization provide at least 4 hours of on-the-job training that was described in a written plan or agreement for any employees in the last 12 months?

⊖ Yes

O No
